

JOUNCE SPACER LENGTH GUIDE

17-ON FORD SUPER DUTY

A jounce spacer limits the up-travel of the suspension system.

Depending on the application, a jounce spacer is required to prevent the suspension from bottoming out on the shock (Fig. 1).

Reference the table for the minimum jounce spacer length required according to the shock part number (Fig. 2).

Confirm the aftermarket lift kit includes the appropriate jounce spacer for a FOX 2.5 Performance Series shock.

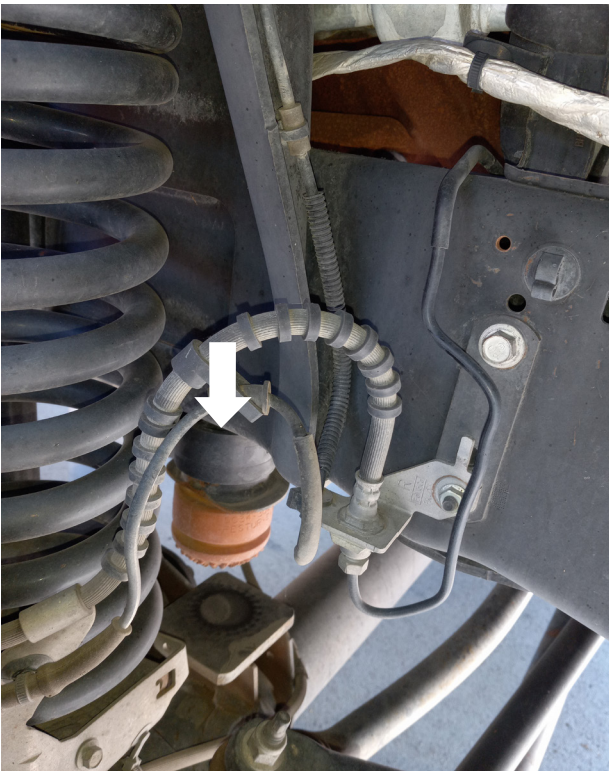

Fig. 1: Super Duty jounce spacer.

FORD SUPER DUTY FRONT SHOCKS	
Lift Range	Minimum Spacer Length
2-3.5"	1.5"
4-6"	4"
6-8"	4"
